PROFILE

Hi, I'm a web developer with 4 years of experience, specializing in websites like e-commerce platforms, service sites, and POS systems. I build APIs for Android apps and web platforms, including a major government project. My backend stack is PHP with Laravel, and I'm skilled in HTML, CSS, JavaScript, Bootstrap, Semantic UI, Ajax, and Vue.js for dynamic front-end development. I've developed systems across industries like hotel, inventory, and restaurant management. Lately, I've been focused on live streaming apps, implementing real-time features using Socket supporting PK battles, chat, video calls etc.

EDUCATION

Bachelor Of Science

Computer Technology,
Dhaka

GPA: 2.89/4.0

Year 2018
